

COMPANY PROFILE & PRODUCT CATALOGUE

Comfort you can trust.

Manufacturer of medical slippers and comfort footwear — since 1992.

About Jennyko Group

Established in 1992, Jennyko Group SARL is a manufacturer specialised in producing medical slippers and comfort footwear.

For more than 30 years, the company has been committed to delivering products that combine comfort, durability, quality, and reliable craftsmanship.

Over the years, Jennyko has continuously invested in modern production equipment, improved manufacturing techniques, and strict quality control to ensure every product meets high standards.

Today, Jennyko proudly serves local and international markets with a growing collection of comfort footwear designed for everyday use.

Three decades of comfort

1992

THE BEGINNING

Jennyko Group SARL is founded as a manufacturer specialised in medical slippers and comfort footwear.

Over the years

BUILDING CAPABILITY

Continuous investment in modern production equipment, improved manufacturing techniques, and strict quality control — so every product meets high standards.

Today

LOCAL & INTERNATIONAL

A growing collection of comfort footwear for everyday use, serving local and international markets from Lebanon.

Built on five commitments

Comfort

Footwear designed for everyday use, from medical slippers to daily comfort styles.

Durability

Products made to last, delivered consistently for more than 30 years.

Quality

Strict quality control so every pair meets high standards.

Craftsmanship

Reliable craftsmanship, refined through continuous improvement of technique.

Variety

51 models across four categories — a growing collection.

“Comfort, durability, quality, and reliable craftsmanship — since 1992.”

04 — MANUFACTURING

Made in our own workshop, in Lebanon

Every Jennyko pair is made in-house in our Lebanese workshop — from cutting uppers and straps, to moulding polyurethane comfort soles, to assembly, finishing and boxing.

Since 1992 the company has continuously invested in modern production equipment and improved manufacturing techniques, so that every stage of the process is carried out under one roof, to one standard.

[PRODUCTION FACILITY]

Our workshop is equipped with precision cutting, stitching, finishing, and assembly stations, allowing us to maintain complete control over every stage of production. Skilled craftsmen oversee each process to ensure consistent quality and reliable delivery.

From raw material to finished sole

Two-component polyurethane is measured, mixed and poured — expanding into the cushioned foam at the heart of every comfort sole.

SLIPPER PRODUCTION MACHINERY

PROCESS CONTROL PANEL

MANUFACTURING PROCESS:

Cutting → Stitching → Lasting → Sole Attachment →
Finishing → Quality Inspection → Packaging

06 — QUALITY CONTROL

Every pair, checked to a high standard

Strict quality control is applied throughout production to ensure every product meets high standards — a commitment held since 1992.

Every pair undergoes multiple quality checks, including material inspection, stitching accuracy, sole bonding strength, comfort assessment, dimensional verification, and final visual inspection before packaging. Our quality management system ensures that each product meets Jennyko's standards for durability, comfort, and craftsmanship.
